

Box Scraper

KANGA Box Scrapers are ideal for ripping, levelling, finish grading, backfilling and general scraping and cleaning. The box design holds a larger volume of material compared to a traditional grader blade, providing the operator with more control moving material over distances.

Like all Kanga implements, our Box Scraper is built for quality, and to comfortably handle extra material and load. A welded rigid box design, braced left to right with box section and front to back with flat bar. The side walls and rear blade are reinforced with a gusset in the corners.

The tines on the front of the Box Scraper are fully adjustable, either individually or as a set, to enable scarifying or soil ripping.

Code	K120BS	K180BS	K240BS
Size reference	1.2m 4'0"	1.8m 6'0"	2.4m 8'0"
Construction	Fully welded, rigid (braced and gusseted), boxed tool bar		
Mouldboard (mm)	430 x 5		
Cutting edge	150 x 12mm, high tensile, reversible. 1 x front facing and 1 x rear facing		
Linkage	Double clevis, category 1		
No. of tines	4	6	8
Overall width (mm)	1230	1830	2440
Tractor range (hp)	15 - 30	25 - 40	35 - 50
Weight (kg)	150	205	290
