

# FMA Series Rotary Hoe

BULLY FMA Series Rotary Hoes are light-duty chain drive rotary hoes designed for hobby farmers with compact and subcompact tractors ranging from 15 to 28hp.

These rotary hoes are used to loosen, mix, and prepare soil in a variety of ground conditions. They are ideal for homeowner landscaping, small nurseries, gardens and smallholding farms.

A friction clutch provides protection from overloading when working with tough soil, while the chain-supported rear deflector is self-levelling, leaving a smooth finish after each use.

## 3-Point linkage

Category 1, quick-hitch, compatible double clevis mount.

## Side transmission

Chain-drive transmission with chain tensioner and oil-level sight glass.

## Blades

Four-blade-per-flange configuration. C-curved blades excel in cutting, turning and refining softer or looser soil types. Their smoother cutting action requires less horsepower to produce a finer finish.

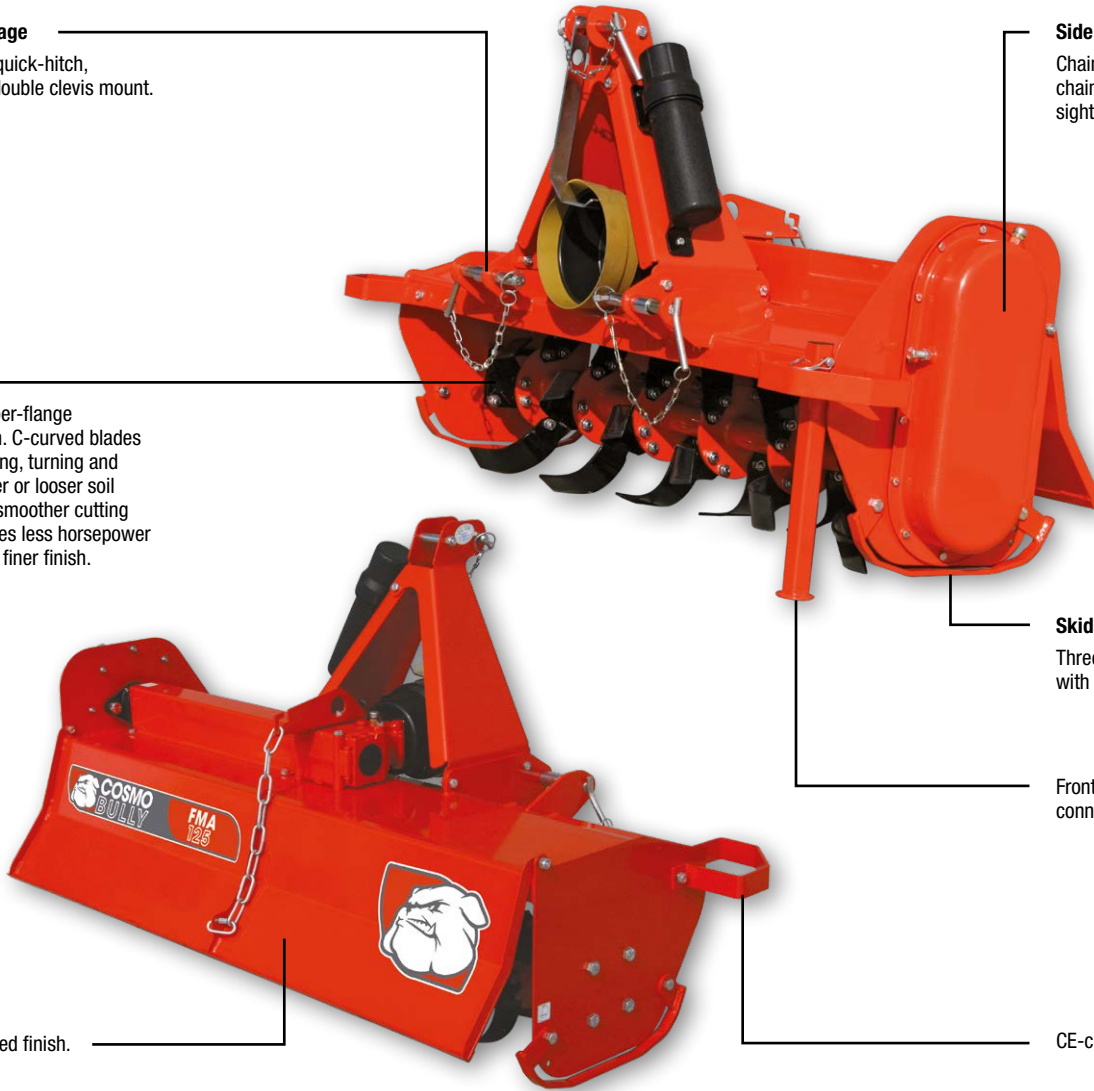

## Skids

Three positive-locking positions with individual bolt holes.

Front parking stand facilitates connection to tractor.

Powder-coated finish.

CE-compliant guarding.

Code	TBFMA105	TBFMA125
