PL SERIES FERTILISER SPREADER

Made in Italy, the COSMO PL Series Fertiliser Spreaders suit tractors from 30 horsepower and up, with larger models requiring 35 horsepower or more. They're a practical choice for operators working across small farms, lifestyle blocks and turf applications.

These spreaders are designed for distributing granular, powdered or pelletised fertiliser and seed across paddocks, lawns and horticultural plots. They're well-suited to tasks where accurate coverage and efficient material use are essential.

Material is dropped directly onto a spinner disc, which distributes it across a working width of 6 to 14 metres. The conical hopper shape supports consistent flow and helps minimise waste during operation.

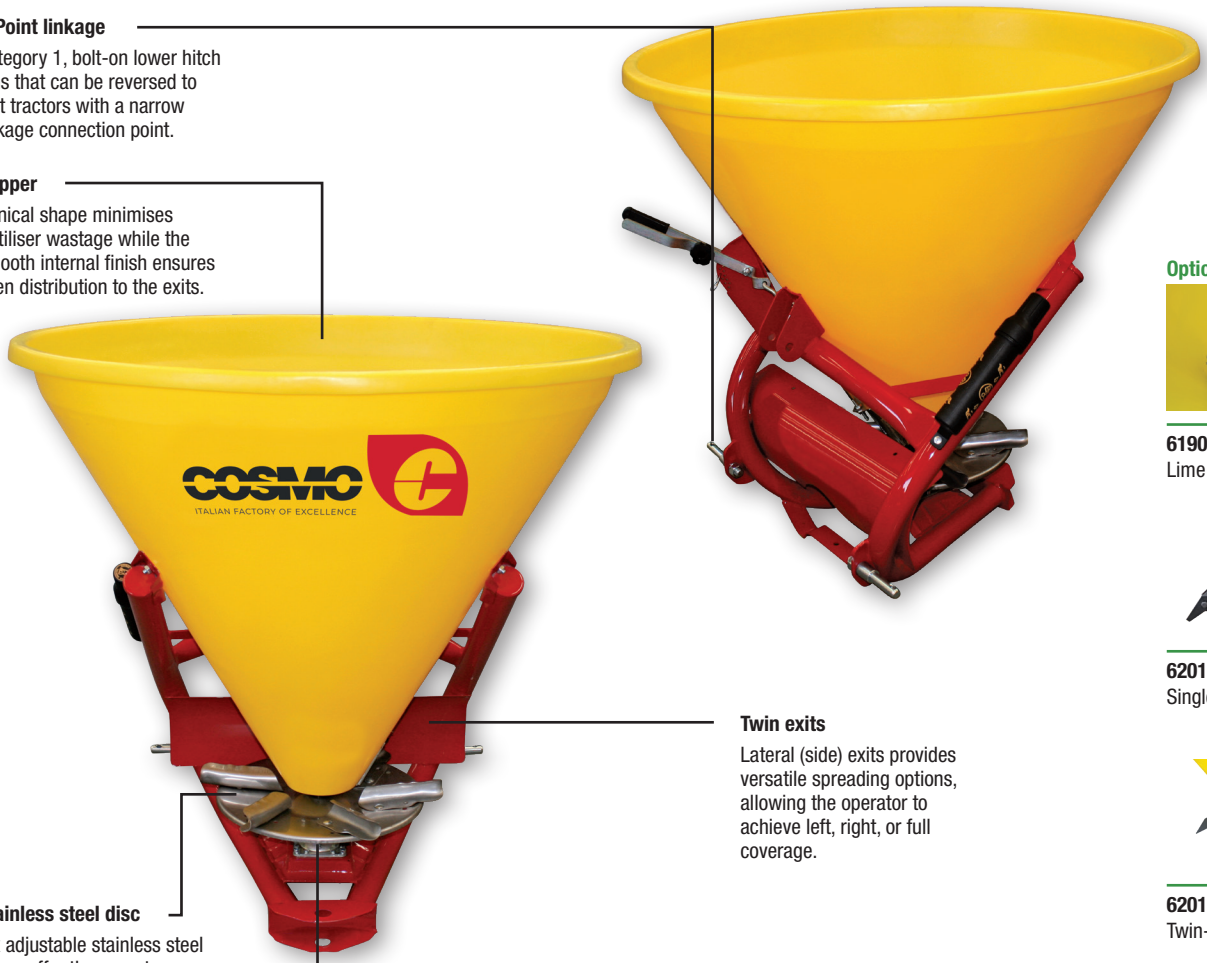
The PL Series features a heavy-duty PVC hopper that is UV stabilised for Australian conditions. Its rust-resistant construction makes it a logical choice when working with corrosive fertilisers, and the smooth internal finish supports even distribution.

3-Point linkage

Category 1, bolt-on lower hitch pins that can be reversed to suit tractors with a narrow linkage connection point.

Hopper

Conical shape minimises fertiliser wastage while the smooth internal finish ensures even distribution to the exits.



Twin exits

Lateral (side) exits provides versatile spreading options, allowing the operator to achieve left, right, or full coverage.

Stainless steel disc

Six adjustable stainless steel vanes offer the operator additional spreading pattern adjustment, while the direct drop of material onto the spinner disc ensures uniform and precise distribution.

Drive system

Series 2 PTO shaft driving a single-speed, pressed metal, grease packed, gearbox.

Code	CPL400	CPL500
Reference	400ltr PVC Hopper	500ltr PVC Hopper
Tractor range (hp)*	30+ I 25+ @ PTO	35+ I 29+ @ PTO
Capacity (lt/kg)	300 / 350	385 / 450
Spreading width (m)	6 - 14	
Dimensions		
Width (mm)	*1080*	*1110*
Depth (mm)	*1080*	*1110*
Height (mm)	*1120*	*1170*
Weight (kg)	60	63
