

Made in Italy, the COSMO Mixer suits tractors from 35 horsepower and up. It's a compact, PTO-driven implement designed for mixing and transporting materials on farms and construction sites. Common applications include preparing concrete, mixing animal feed, composting and washing produce, particularly in areas that are difficult to access with larger equipment.

Inside the hopper, three internal paddles blend cement, gravel, sand and water into a consistent mix. These paddles are removable, allowing the mixer to be adapted for other tasks such as feed preparation or bulk washing. The large-diameter hopper supports fast loading and efficient operation, helping operators complete jobs with minimal handling.

Finish

All painted components are finished using COSMO's multi-stage, automated painting system, designed to enhance surface protection and finish quality for long-term durability.

Hydraulically controlled tipping mechanism

A single-acting hydraulic tipping mechanism (18" x 2" ram) enables controlled emptying.

Transmission

A chain-driven system with a 10:1 reduction ratio ensures a slow rotation of the hopper, thoroughly mixing a range of material.

3-Point linkage

Category 1, bolt-on lower hitch pins with multiple vertical mounting points.

Raising or lowering the pin height changes the geometry on the implement in relation to the tractor.

This feature ensures the hopper can be filled to the maximum working capacity and completely emptied.

Hopper

A wide-mouthed hopper, formed from two rolled cones of 3mm steel, is fitted with internal paddles for a smooth mixing action. The COSMO Mixer has a maximum working capacity of 195 litres.

Code	CM80-320
Reference	320ltr
Tractor range (hp)	35+ 29+ @ PTO
Transmission	Chain drive (10:1 reduction ratio) 540rpm
Capacity	195lt / 0.2m ³ / 7ft ³
Tipping mechanism	Hydraulic (18" x 2" ram)
Dimensions	
Width (mm)	860
Depth (mm)	930
Height (mm)	950
Weight (kg)	100
Price
